EXPERIENCE

09.2014 present

EPAM Systems (UBS)

.NET DEVELOPER

Developing from scratch bank accounting system as web application using MSQL Server and Oracle to store big amount of data for Union Bank of Switzerland.

Responsibilities:
- Gathering business requirements, performing architectural design and detailed analysis.
- Prototyping, Development, testing, deploying and maintenance of application.

Achievements:
- I have created application from scratch that helped decrease costs for the bank.

02.2013 09.2014

Dell STORAGE GROUP (SOFTHEME)

FRONTEND-BACKEND .NET DEVELOPER

Developing data protection software including backup, replication, disaster recovery, protecting big data servers in the cloud and VMs, recovering Exchange and SQL Server applications using C# and RESTfull principles.

Responsibilities:
- Researching emerging technologies
- Working on the design, implementation, testing, deployment and maintenance of the tool.
- Conducting interviews, lecturing programming, guiding other developers how to write a better code.

Achievements:
- I have introduced many new technologies into existing application.

02.2012 02.2013

TERRASOFT

WEB DEVELOPER (UI)

Developing customer relationships management (CRM) system for tracking marketing, measuring campaigns, automating activities within a single web (ASP.NET) application. Solving core tasks using C# interacting with MS SQL an Oracle databases.

Responsibilities :
- Development, configuration and support of framework that is used for wide range of applications.
- Troubleshooting complex system issues and providing solutions.
- Creating reusable UI components from scratch.

Achievements:
- I have created many UI components that were widely used in many applications and some components were built on top of them.

05.2011 02.2012

IT-DIMENSION

JUNIOR .NET DEVELOPER

Designing and programming Windows Phone 7 applications. Creating from scratch windows phone games. Coding web crawler project for getting statistical information from internet forums over the internet and storing data in MS SQL database.

Responsibilities :
- Development and maintenance of broad range of bespoke in-house applications.
- Writing automation tests and adding integration with social networks.

Achievements:
- I have created solely game for mobile phone and maintained huge database.

EDUCATION

2005 2010

ZAPORIZHZHYA NATIONAL TECHNICAL UNIVERSITY

MACHINE-BUILDING DEPARTMENT

Specialty: mechanical engineering   Degree: bachelor

02.2012 09.2012

CYBERBIONIC SYSTEMATICS COURSES

C# PROFESSIONAL, ASP.NET

09.2012 - present

STANFORD ONLINE COURSES
